

Net Zero Sustainability Rural Economy Energy Transition

**Partners in Greener
Tomorrow**

Business Summary

20000 Tons

Per month biofuels supply;
(Pellets, Briquettes and
Agrowaste)

150+

Customers acquired over 4 years
including 90% repeat orders from
Marquee Clients.

2200+

Dedicated supplier
network across pan India.

Biofuels Junction is a pan- India, technology- driven sustainable biomass supply chain company, linking farmers to industries, pioneering decarbonization initiatives, and fortifying the circular economy.

Biofuels Junction also has a presence across the value-chain from bio-mass collection to delivering performance-based long term, recurring steam contracts. Biofuels is empaneled with marquee clients across locations.

Representative Customers

Steam Contracts

Achievements

- Earned accolades from Hikal Ltd. for the outstanding operation of a 15 TPH boiler at their Taloja facility.

Steam contracts are one of the fastest growth areas for us. These are steam output-based contracts that reduces the supply risk for our clients and share the risk/reward in managing the steam using the biofuels. Biofuels has successfully executed steam contracts with a variety of clients. Biofuels Junction manages the entire boiler management operation for our client that includes supplying the biofuels, managing the manpower and disposal of the ash residue if any.

Why Choose Us?

- Next Gen Expertise.
- Data Driven Decisions.
- Skilled Resources & Advanced Record-Keeping.
- Performance Analysis for Operational Excellence.
- Proven Results & Repeat Business from Major Clients.
- Committed to Sustainable Practices.

What you get?

- Focus on Core Business.
- Consistent Quality.
- Operational Excellence.
- Cost Efficiency.
- Plant configured steam load for maximum efficiency.
- 200+ Skilled Experts & Trusted by Top Clients.

Direct Socio Environmental Impact

Our business positively impacts environment and rural economy !

Biofuels Junction through its supply universe (Owned, operated, contracted) created social Impact

Reduce carbon footprint

Since inception, 3 lakh tons of CO2 emission saved which is equivalent to **3 lakh carbon credits**

Boost Rural Employment

500+ rural entrepreneurs adding over 4000 rural jobs; Added over Rs **300 mn of net income to rural economy**

Augment Farmer Income

Support to **35,000 Farmers**; Adds total **Rs 200 mn income to farmers**

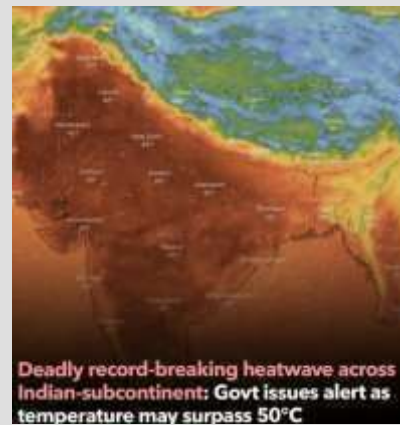

Corporate Savings

Corporate India **saved over Rs.1 bn** by replacing the furnace oil in their boilers; also improving the working conditions for the labors

Touched agrarian geographies especially -**draught & farmer suicide prone** Vidarbha, Marathwada, and MP, Gujarat, Chhattisgarh, Karnataka

Climate change – Reality and Solutions

Problems

Global Warming

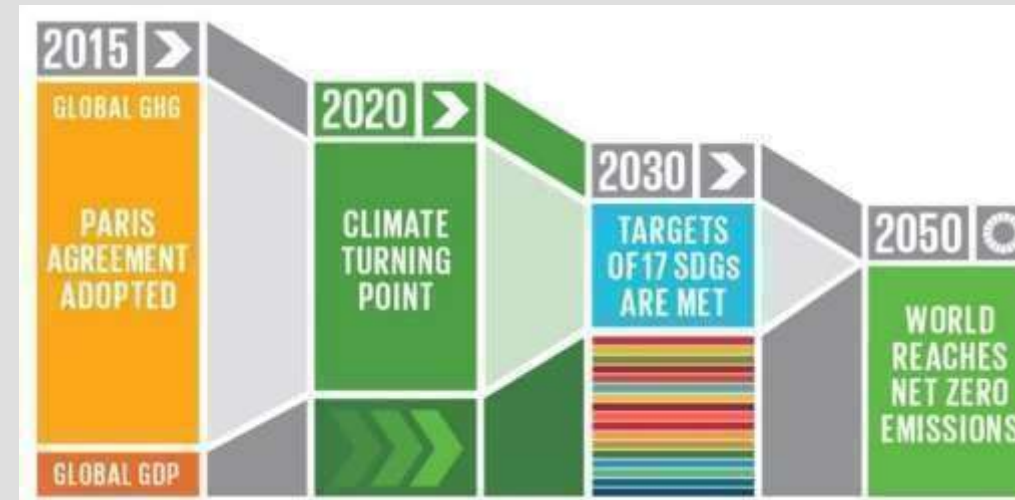

Depleting Resources

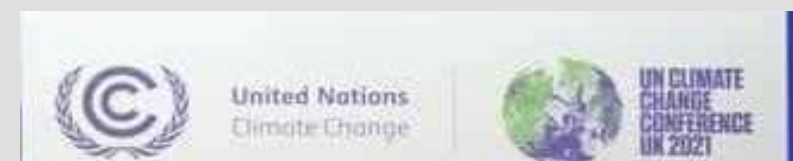

Pollution

World Actions

India Targets

Reduce its total projected carbon emissions by 1 bn tons from now, and bring down the carbon intensity of its economy by less than 45%

Our business – Managed Marketplace for Solid Biofuels

Solid Biofuels are the **Cost Economical alternatives** to the coal and Furnace oil

- High calorific value than furnace oil and coal
- Rapid adoption due to increased oil and coal costs
- Carbon neutral, reduction in SOX/NOX
- Raw material (wood and crop waste) abundantly available in India
- Support Rural/Farm economy

Strategic Shift Globally

Replacement of Fossil Fuel with **Solid Biofuels** (Briquettes and Pellets)

Solid biofuels are made from agriculture residue or forest wood waste

Biofuels Plant fueling circular economy

Single briquette plant contributes positively across value chain

Promotes Rural Entrepreneurship

- ✓ Rs 1 lakh/ month of earnings potential to Rural Entrepreneur
- ✓ **Employment generation** – supports 8 workers at the plant for full year

Environment Friendly - Carbon Neutral

- ✓ **Carbon neutral** fuel vis-à-vis all fossil fuels
- ✓ Minimal SO_x / NO_x / PM - thus less pollution
- ✓ **Sustainable** – Made from recurring residue/waste

Support to Rural Economy

- ✓ **Augment 1000+ farmers' income** by upto Rs 25 lakh
- ✓ Supports 25-35 labour in collection – with Rs 90 lakh worth of earnings

Most viable Fuel- Cost savings

- ✓ Savings of 50%+ vis-à-vis Furnace oil or CNG
- ✓ Profitable vs Imported coal

Cost economics of solid biofuels

Briquettes and Pellets are proven to be **HIGHLY** economical: **20-50% Cheaper**

Industrial Boilers-

Cost (Rs/1000 Kcal)

Furnace oil	– 6,000
Indonesian Coal	– 2,200
Briquettes	– 2,000

Commercial Burners–

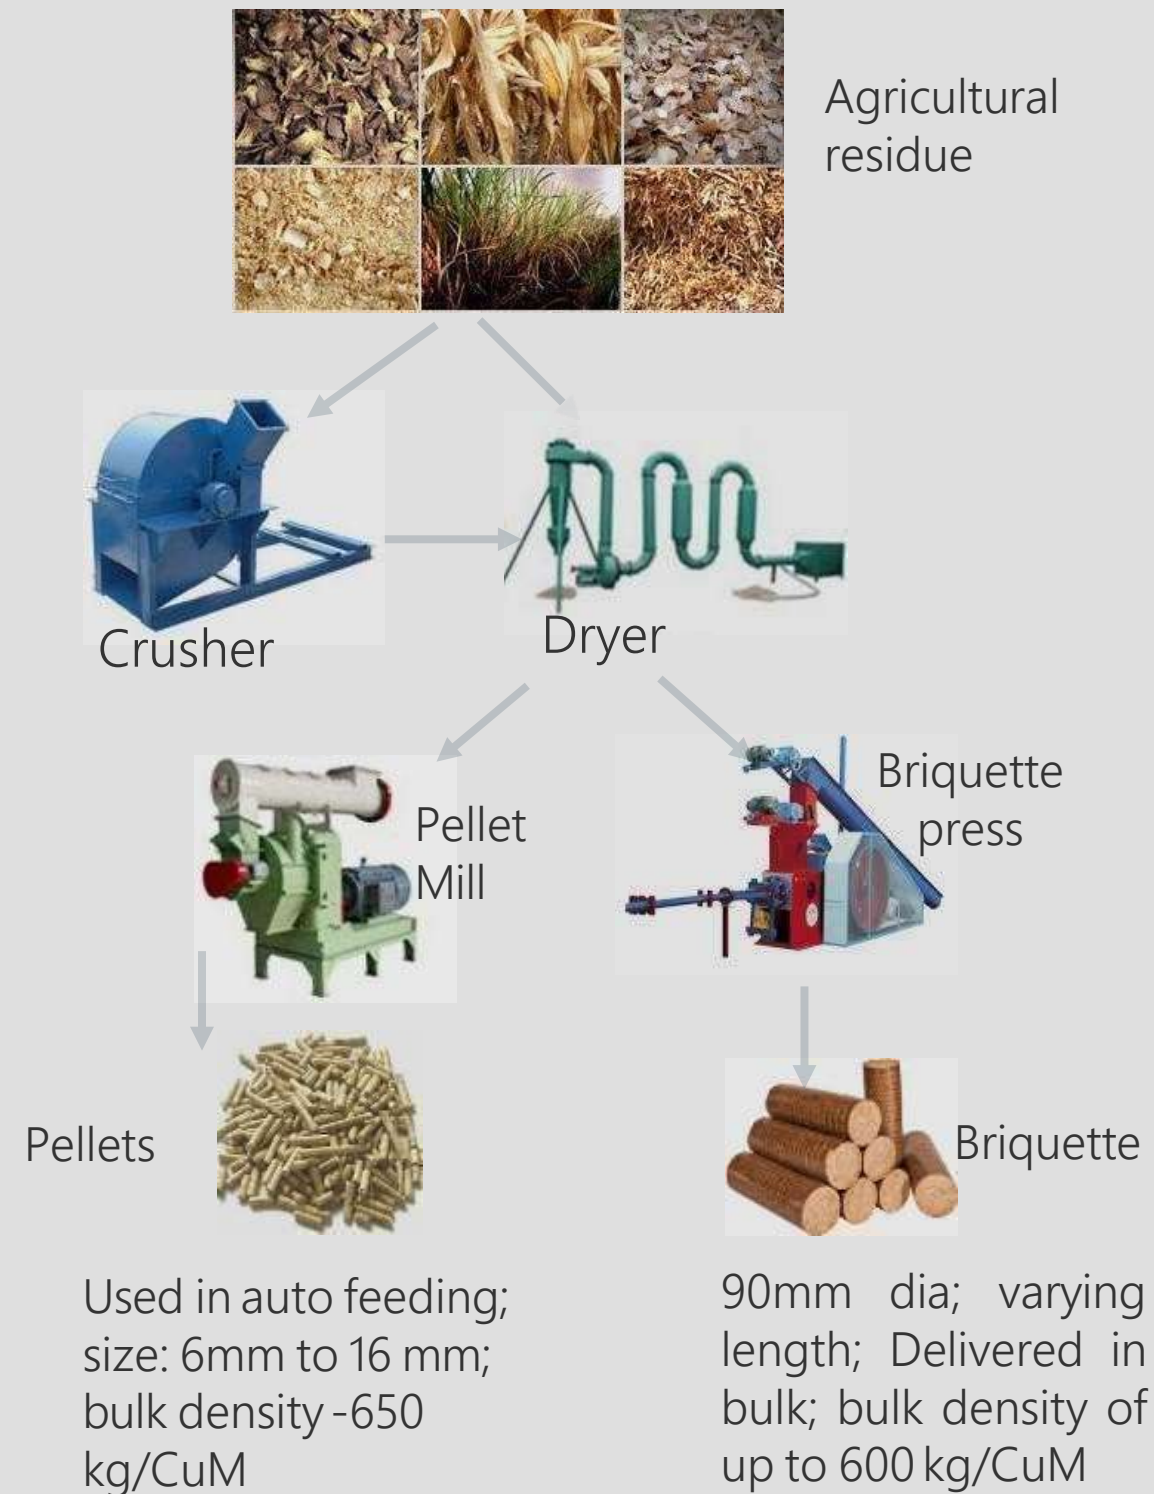

Cost (Rs/1 Kcal)

LPG	– 8.0
Diesel	– 10.0
Pellets	– 4.0

Anatomy of Solid Biofuels & SKUs

What are Briquettes and Pellets

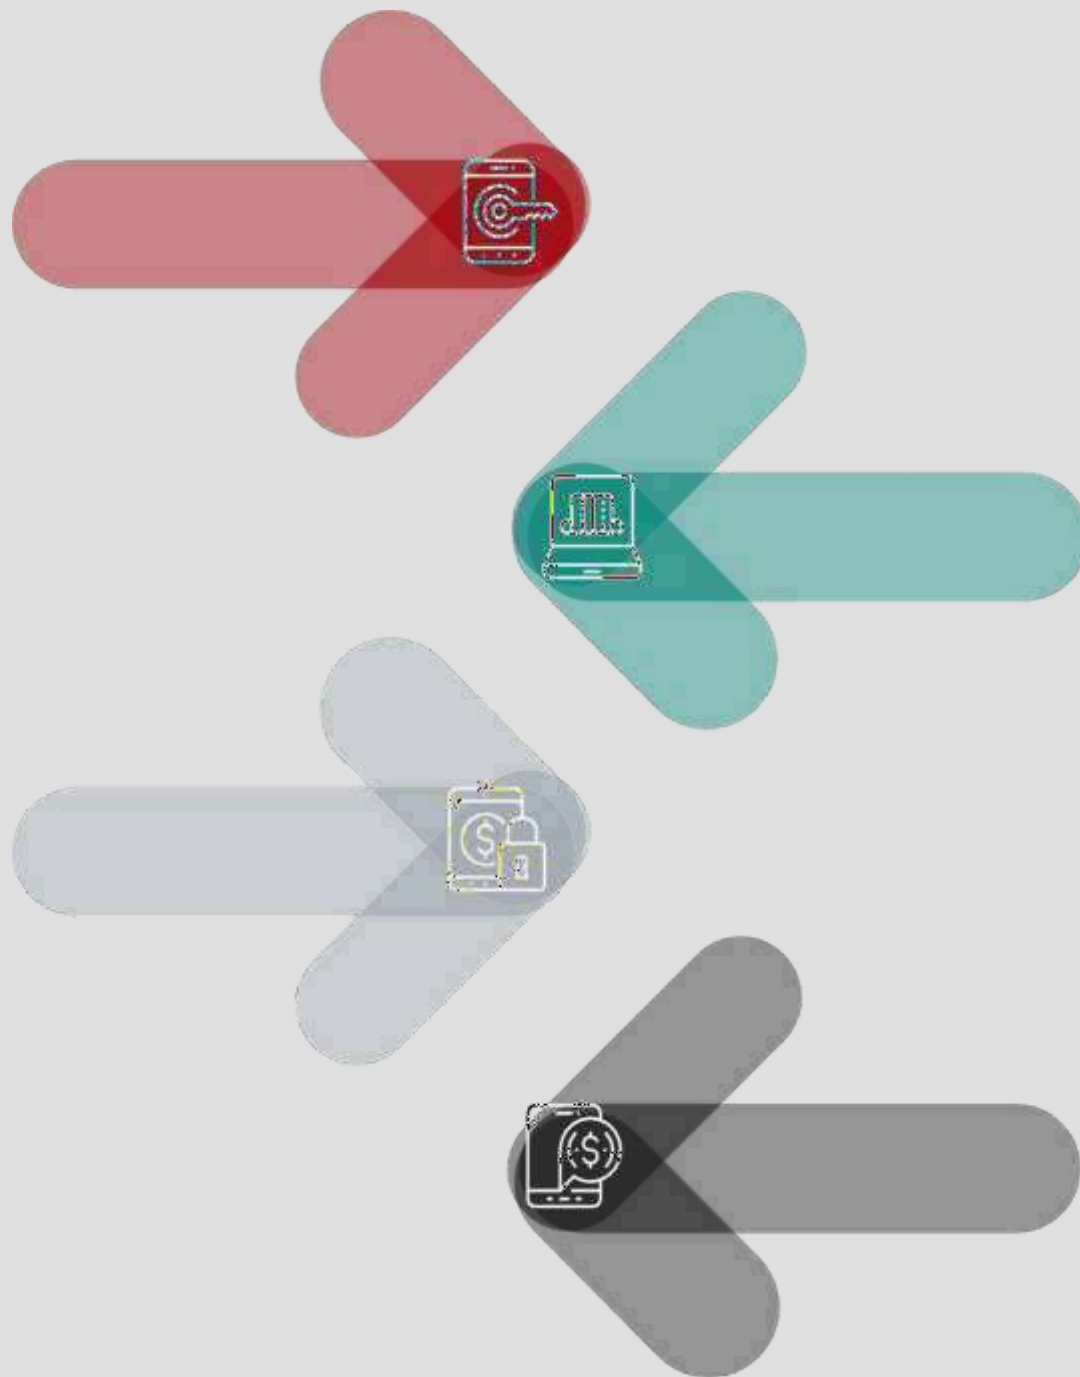

Variety of agri and other residues for biofuels

Agriculture residue	Agri processing waste	Municipal and Industrial waste	Energy plantation	RM Import	Locally produced
 ✓ Soy husk, ✓ Cotton stalk, ✓ Mustard Husk, ✓ Chana husk, ✓ Ground nut shells, ✓ Cashew shells, ✓ Sugarcane Thrash ✓ Paddy Straw	 ✓ Rice Husk ✓ Coffee husk ✓ Bagasse ✓ Press mud ✓ Cashew DOC ✓ Saw dust ✓ Cotton Fibers ✓ Palm FibeShell	 ✓ Garden Waste ✓ RDF ✓ Plastic ✓ Industrial Sludge ✓ UCO (Used cooking oil)	 ✓ Bamboo ✓ Napier grass	 ✓ Palm Kerner Shell ✓ Wood Chips	 ✓ Biodiesel ✓ Ethanol ✓ Used Cooking Oil ✓ CBG (Compressed Bio Gas)

Industry Challenges

Though there has been a potential in sector, it has been riddled with multiple factors

Unorganized Sector

Extremely unorganized and distributed sector with no single consolidated player; Complete ignorance of compliance and quality factors

Supply chain constraints

Like farm sector, the manufacturing companies/suppliers are riddled with the supply chain issues resulting in reliability issues

Seasonal

The biomass availability is seasonal; raw material Inventory needs are huge

Long Term Vision

The manufacturing units are always focused on taking the advantage of the subsidy but with no long-term vision for the expansion

Biofuels Junction Advantage

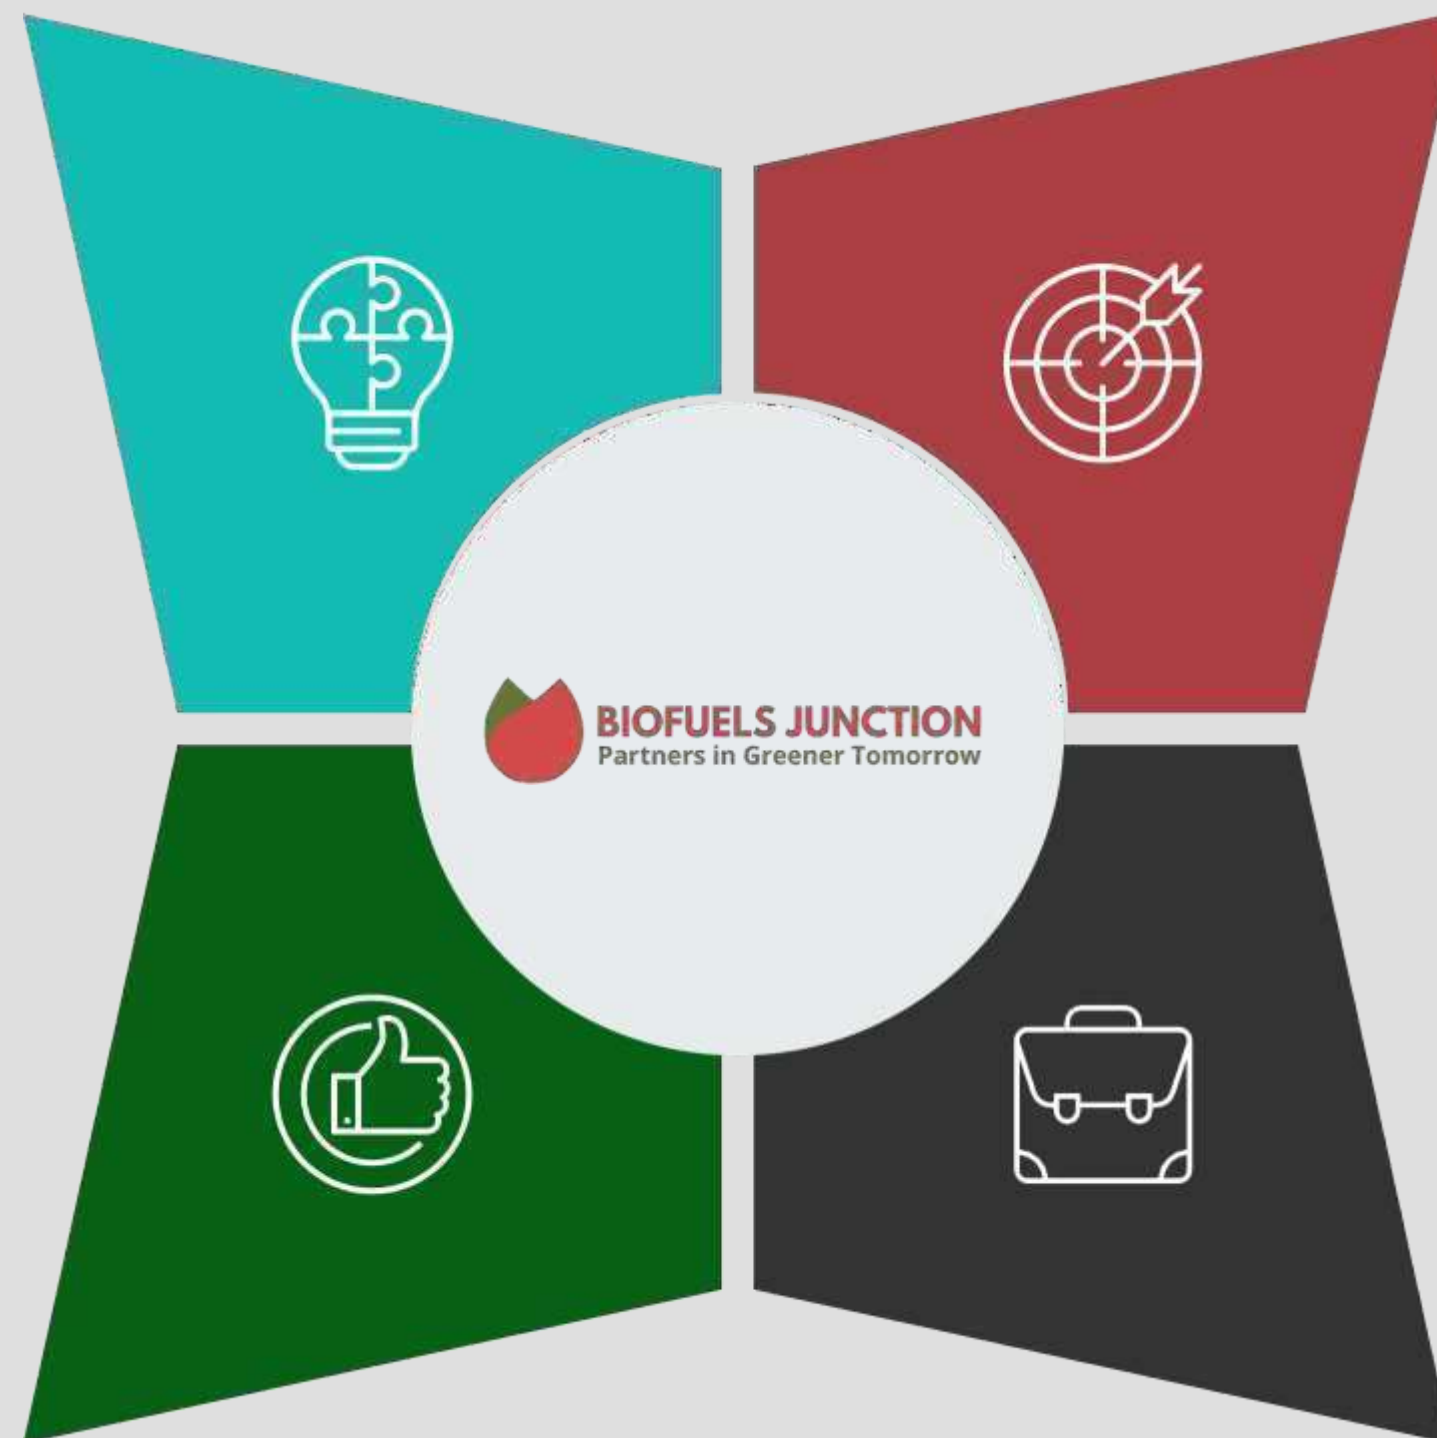

Professionally managed with Reliability and Quality

Strong Demand Generation

Funneling clients with thorough risk management. Strong repeat orders through clients

Supplier Network

Strong supplier network. Educate and develop suppliers at strategic locations with team on the ground

Quality and Reliability

Never compromised on the quality; emphasis on supply chain ensuring reliable supply which gained trust with the marquee clients

Contract Manufacturing

Lean manufacturing to reduce the capital burn; have its own presence in manufacturing as well

junction

Partners in
Greener Tomorrow

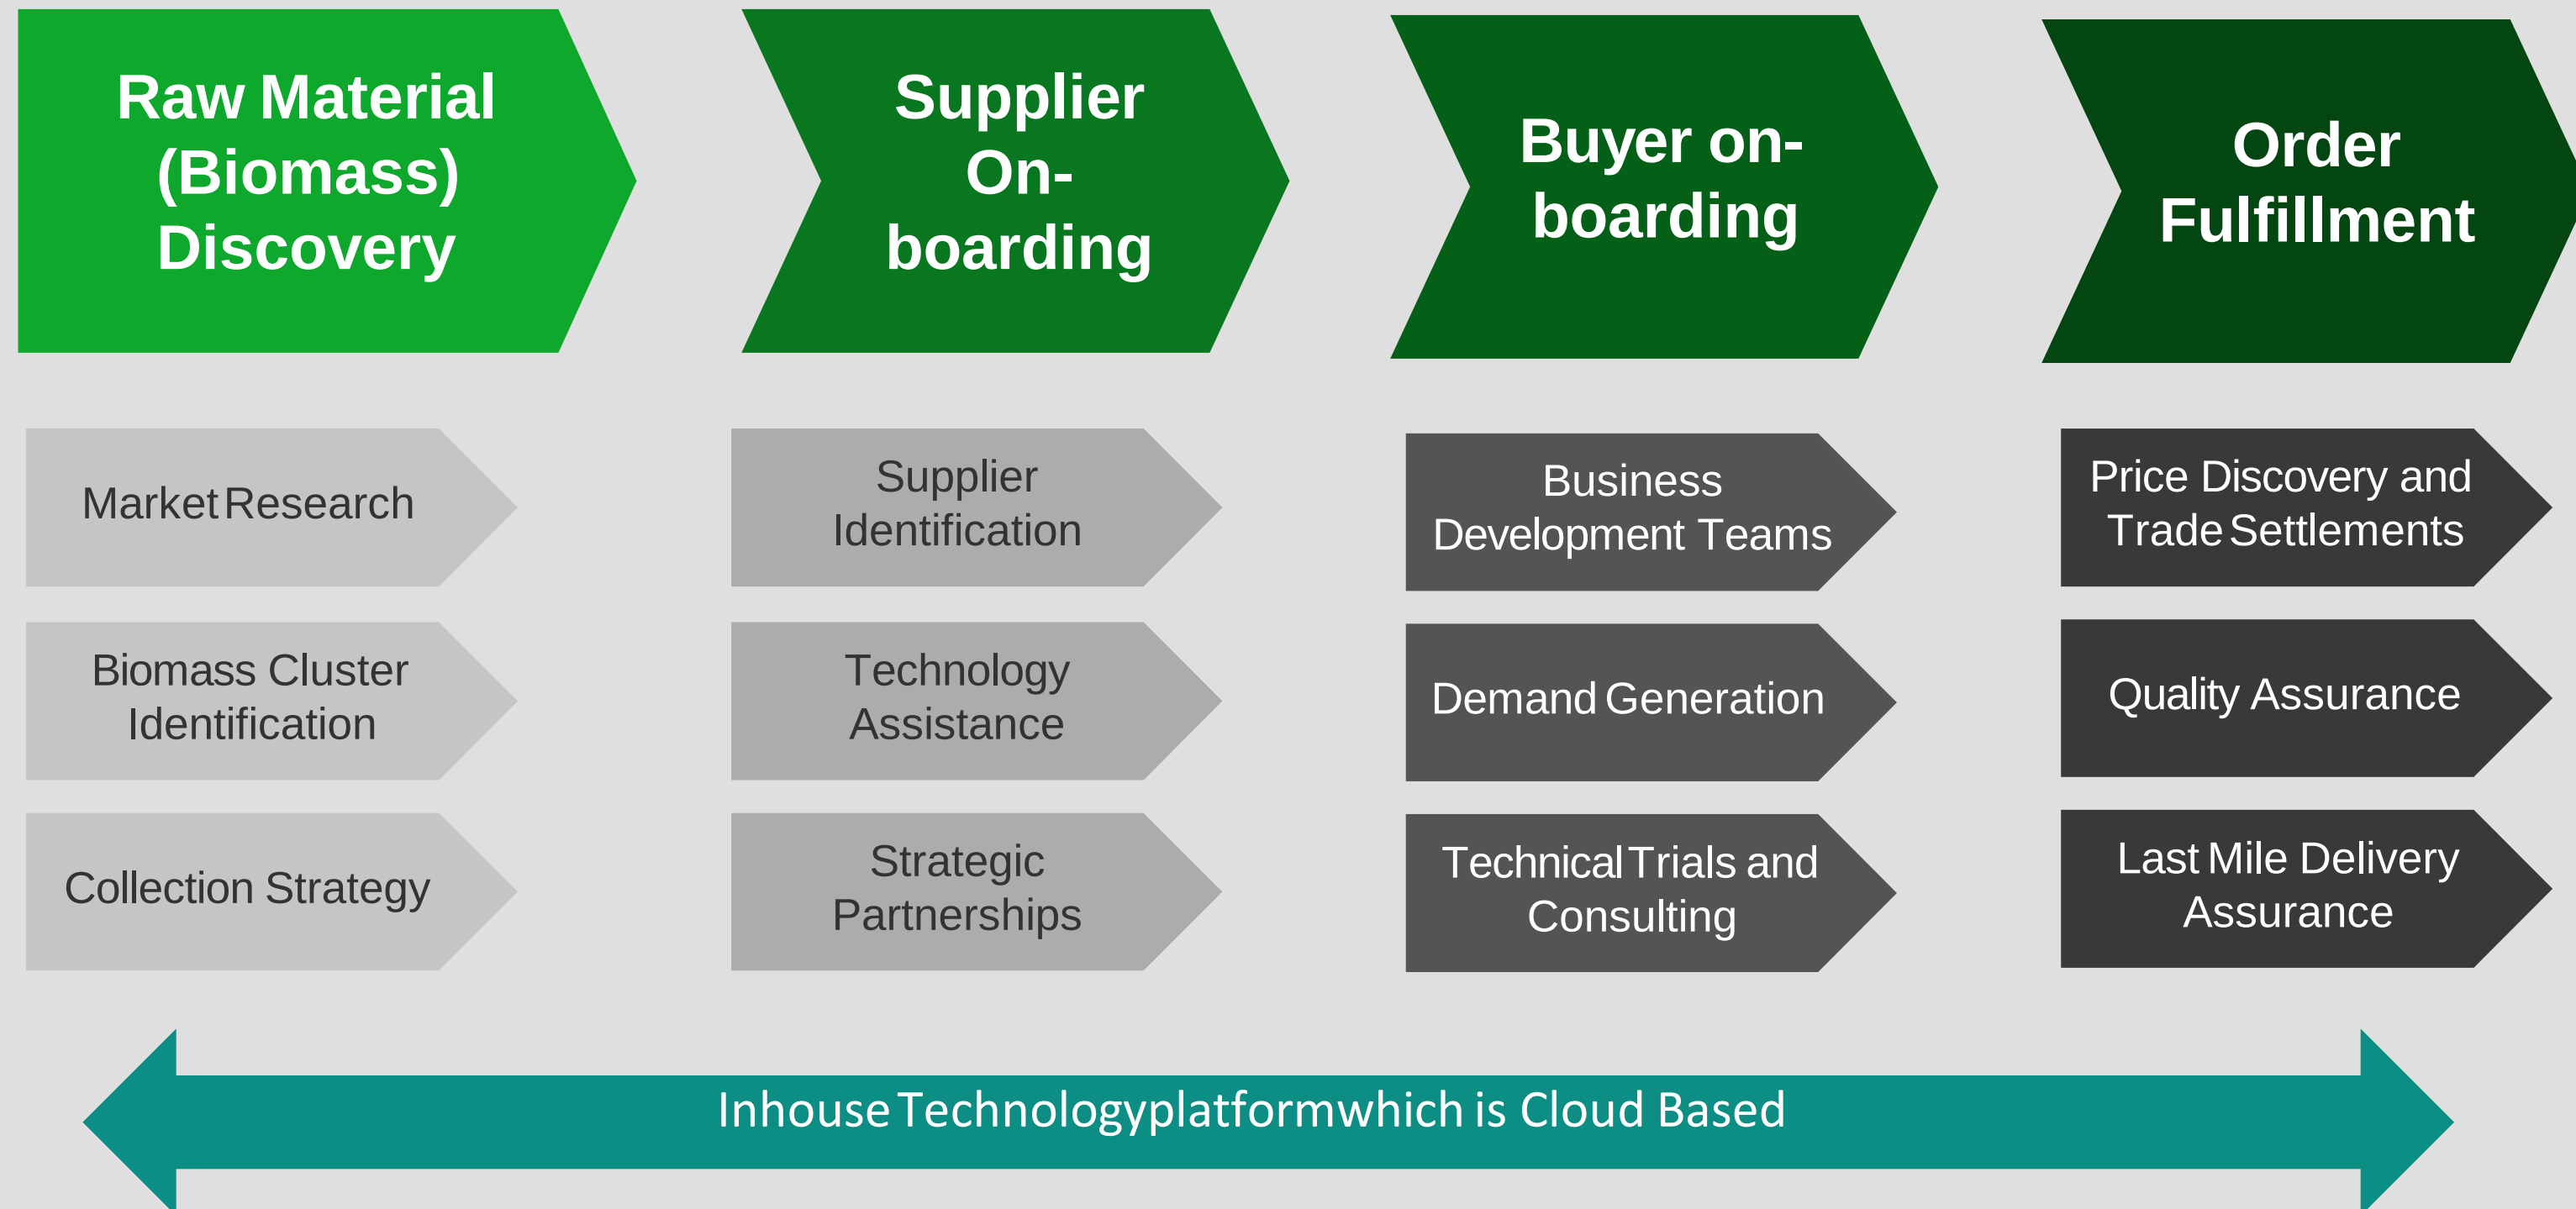

Biofuels Junction is a **technology led**, supply chain provider for the Biofuels industry.

We operate across **entire value chain**, starting from biomass aggregation to providing the long-term **managed solutions** to corporates.

Our customers use solid biofuels in their **boilers and co-fired plants**, as a part of their commitment to **net-zero transitions**.

Our offerings

“Technology Marketplace” for the Solid Biofuels: Procure-Process-Deliver!

Leadership - Founders

**Ashvin Patil –
Director**

Ashvin Patil has more than 20 years of corporate experience in financial and manufacturing sectors. Ashvin has worked in Investment Banking and Equities at ICICI Group, Merrill Lynch, and Phillip Capital not only in India but also in Singapore and Hongkong offices. His responsibilities included equities research, strategic and financial planning and risk management. Ashvin has also worked in the manufacturing facilities at Godrej and Whirlpool providing him the detailed insights into the plant engineering aspects. At Biofuels Junction, he oversees the business development, firm's financial affairs and supply chain risk management. Ashvin has an MBA degree with a Finance major from Jamnalal Bajaj Institute of Management Studies (JBIMS) and Production Engineering degree from VJTI, Mumbai.

**Chaitanya Korgaonkar –
Director**

Chaitanya Korgaonkar has more than 17 years of corporate experience across Banking, Automobile, and Agricultural Commodities sectors. Chaitanya has a deep insights into the Agriculture business and its supply chain which is extremely valuable in firm's growth. At Biofuels Junction, Chaitanya is responsible for the business development, client relationship management and building the partner networks. Chaitanya is an MBA with a marketing major from Mumbai.

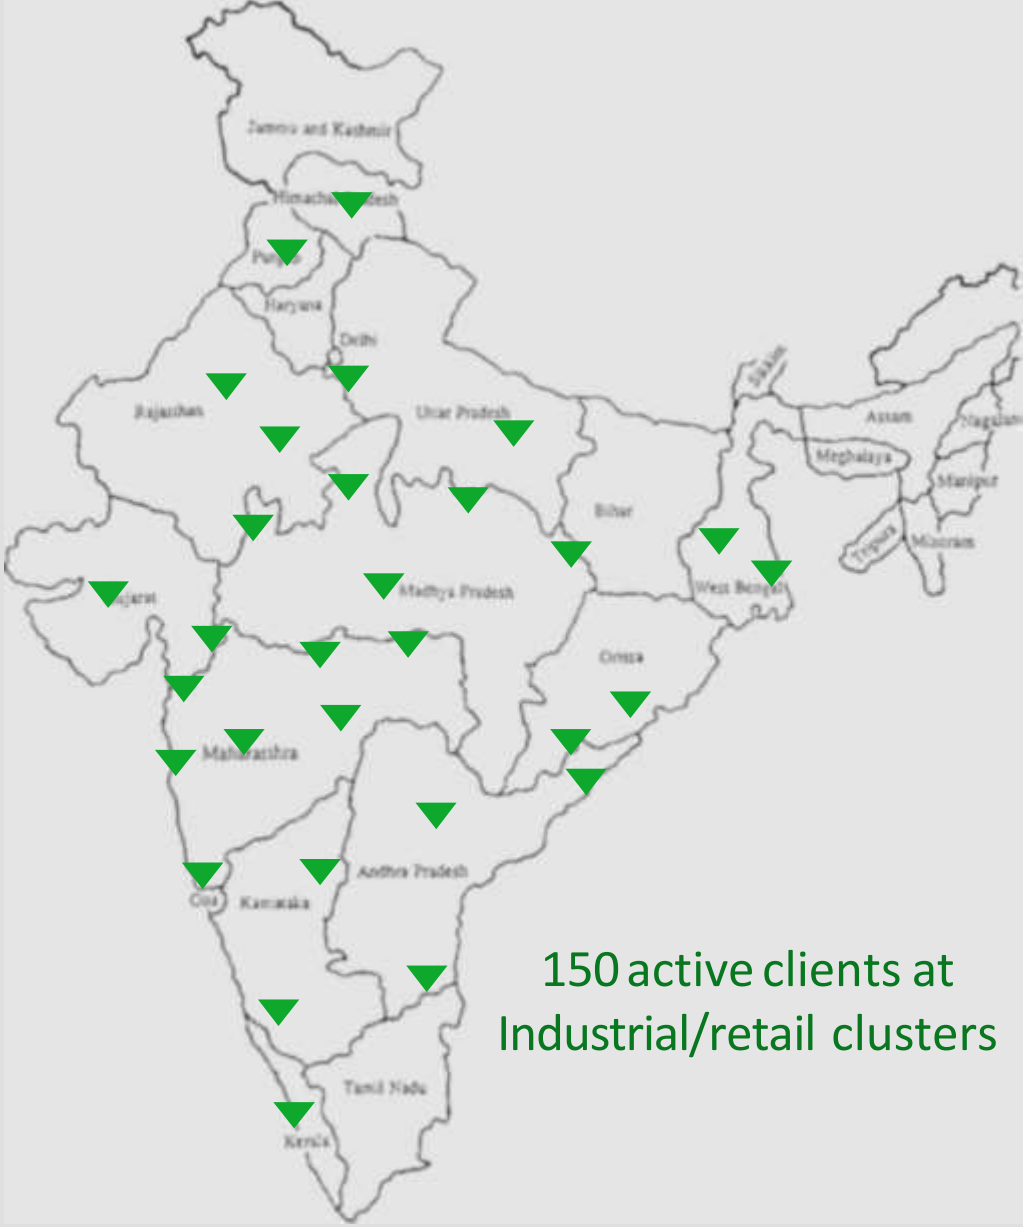

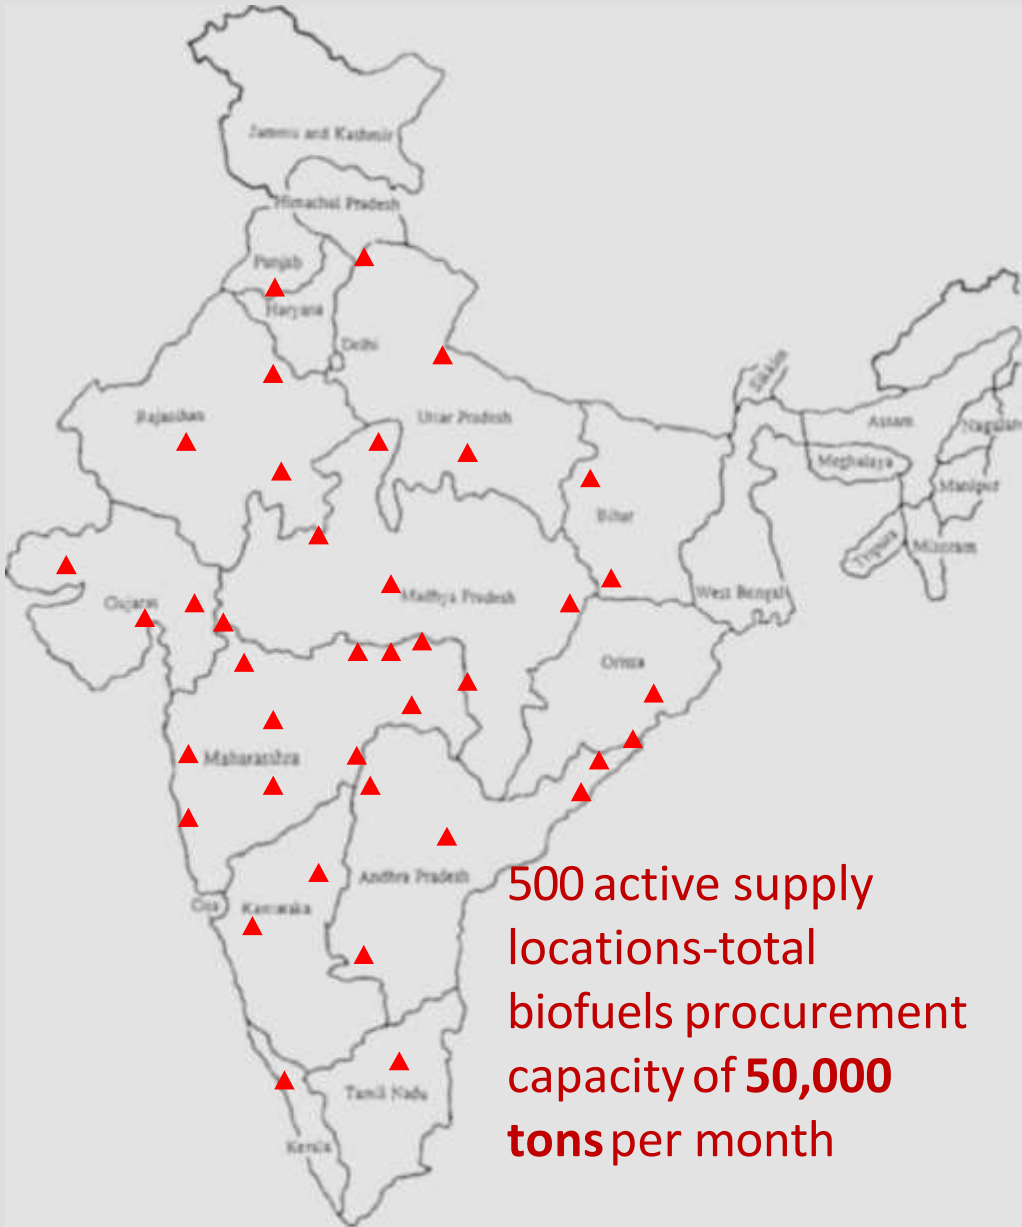

Our Presence

Strong supplier and manufacturing facilities closers to the demand clusters

Supply centres

Demand Clusters

Biofuels supply chain establishments :

Mumbai, Delhi, Chennai, Gurgaon, Ahmedabad, Jaipur, Bengaluru, Howrah, Lucknow, Hyderabad, Indore, Nagpur, Kolhapur, Akola, Amravati, Bhopal, Gaya, Patna

Our Investors

Strong partnerships with Investment Community

✓ Angel Investors with decades of Industry experiences in the following segments

- Banking
- Supply chain
- Information Technology
- Mergers and Acquisitions
- Real Estate
- Consumer Brands
